

Microsoft 365 Backup

Powered by Veeam

Eliminate the risk of data loss

Microsoft 365 provides powerful services, but a comprehensive backup of your data is not one of them. Hybrit Microsoft 365 backup powered by Veeam eliminates the risk of losing access and control over your Office 365 data, so it's always protected and accessible.

Hybrit Backup for Microsoft Office 365 powered by Veeam (the leader in Microsoft 365 backup with 18M users protected) eliminates the risk of losing access to business-critical data and ensures that you remain in complete control. Securely back up all Microsoft 365 services including SharePoint, Exchange, Teams, and OneDrive.

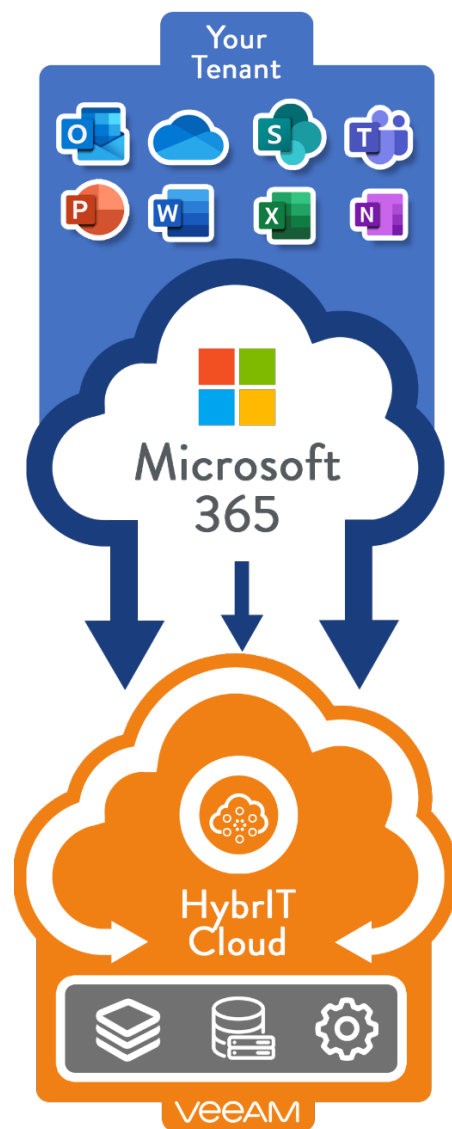

Features

- ❖ Built on a proven supported architecture in a dedicated data centre space, with Uninterruptible Power Supplies (UPS) and generator backup.
- ❖ Hybrit own and manage all aspects of the infrastructure in house, meaning troubleshooting is all through one entity.
- ❖ Restore your data through Veeam Explorers or via the Hybrit Veeam Office 365 portal.
- ❖ Data is copied directly from Microsoft's cloud infrastructure into the Hybrit Private Cloud, so there is no reliance on your internet connectivity.
- ❖ Flexible backup, choose to back up the whole Office 365 organisation or just key users.
- ❖ Quickly recover individual items and efficiently perform eDirectory of data archives so that your data is always available and protected.
- ❖ Add Immutability to your backups to follow the 3-2-1-1-0 rule and protect your organisation against ransomware.

Benefits

- ❖ Protect Office 365 data from accidental deletion and security threats.
- ❖ Quickly restore with industry-leading recovery and flexibility.
- ❖ Meet compliance requirements with fast search-and-find capabilities.
- ❖ Reduction in hardware, resources, and licensing costs.
- ❖ Reduced complexity with no micromanagement required – let Hybrit manage and diagnose your backups for you.
